

America's Agenda

America's Agenda is a family of non-profit organizations that brings together national and international labor unions, businesses, and government leaders who share a common commitment to winning guaranteed access to affordable, high quality health care for every American.

America's Agenda: Health Care for All, our health care reform advocacy arm, has an unrivaled record of building and strengthening comprehensive healthcare reform campaigns in states across the country.

In the course of these campaigns, we have observed an emerging consensus among leaders in diverse sectors about key elements of the kind of modernized health care system that will meet the needs of 21st century Americans. Shared concerns about the affordability and quality of health care among leaders in business, labor, health care, and state and local government have enabled us to build campaign coalitions in Vermont, West Virginia, Illinois, and other states that have crossed party affiliations and united former adversaries behind a common vision for comprehensive health care reform.

America's Agenda campaigns have won unprecedented victories in the states. As Americans look to new leadership in Washington, our state-by-state efforts are providing important templates for federal legislation -- and accelerating the political momentum needed to win it.

The America's Agenda Health Care Education Fund, our research and education arm, is producing the "Summit Conversations on American Health Care for the 21st Century" to explore the extent and the limits of the emerging national consensus. The "*Education Fund*" -- a pioneer in healthcare policy development and analysis -- is our essential partner in achieving affordable, high quality health care for all Americans.
